**Webinar ID: 934 5476 0608 / Webinar passcode: 100664**

---

The Pennsylvania Turnpike Commission is holding a virtual public meeting to provide information regarding the Lafayette Street Interchange Project. The Project is part of the overall Lafayette Street Improvement project in the Norristown area. The interchange falls between the existing Valley Forge and Norristown interchanges and offers a more direct route for Turnpike motorists to access Norristown, Conshohocken, and interspersed commercial, industrial and residential developments along the east shore of the Schuylkill River. Representatives of the Turnpike Commission and members of the project team will be available to provide additional project detail and answer questions.

Anyone needing additional information may contact Mohammad M. Mohammad, Engineer Project Manager at [mmohammad@paturndpike.com](mailto:mmohammad@paturndpike.com).  
Una traductora de español estará disponible durante la presentación.
